Please share your feedback and suggestions about this course and the way it was taught. It is important that you talk about your learning experience rather than attaching broad labels (i.e. the instructor is great or bad) and provide enough detail to illustrate your point.

Please describe one specific learning activity that was particularly useful in helping you to meet the learning objectives of this course.

Josh was always very quick to respond to emails and answer any questions I had!

The practice exams were extremely helpful and I utilized each practice exam as well as both attempts for each.

Reading

Final project was very challenging but very rewarding!

Implementing the research projects. Conducting and writing the actual research helped my learn and grow in this class.

Running the SPSS with step by step instructions and also an example of how the results were interpreted. I appreciated the feedback on my papers as well.

I enjoyed our final assignment where we made up our own research proposal.

Please describe any factor or situation that impeded your learning in this course.

None.

I'm not sure anything impeded my learning, but this was a very self motivated course - by far, the most self reliant of any online course I've had thus far - it was tough!

Technical issues during exams

None!

The only thing I had trouble with was the lectures. I wish the were more visually engaging instead of listening. They were informative but I suggest to add some visual aids as well.

Can't think of any.

N/A

What specific suggestions do you have to make this course a better learning experience?

None.

I'm not sure I even want to suggest this, as I hate this aspect of other online courses, but I think it would have been beneficial to have weekly discussion board writing topics that related to the weekly reading and/or lecture. Especially could have been beneficial on the weeks where the only assignments were reading and narrated lectures.

Video classes

None, this course was the best that I have ever had through CMU. Challenging but also fun!

honestly this was a great class to be apart of. I enjoyed the research and how the class flowed. I would suggest to possibly engage the other students more with each other.
